Behind the Bean

In this issue of the Vanilla Vine, Nielsen-Massey Vanillas is proud to introduce John Ruffolo. John is responsible for picking and shipping all of the orders sent via UPS and FedEx ground at the Waukegan, Illinois facility. He has been a part of the Nielsen-Massey team for seven months. John is responsible for fulfilling a large number of orders daily. With constant shipment requests taking place, John easily stays busy throughout his work day. However, John often makes time in his busy schedule to lend a helping hand to wherever is needed.

John takes his job seriously and is a wellrounded employee, as shown by the certifications he has earned. John is Hazmat certified; safety trained, has studied conflict resolution, and has training in ergonomics and 5S. Outside of work John enjoys things like sports and spending time with his family. He resides in Kenosha, Wisconsin with his wife and three kids. He is the proud father of two sons and a daughter. Although John has only been at Nielsen-Massey Vanillas for a short time, his enthusiasm and dedication to his job has made him a valuable asset to the team.

It’s Not Too Early to Plan for Fall

The daffodils are just barely up, but it’s not too early to start thinking about merchandising for back to school and fall holiday sales!

This year, with a national emphasis on kids’ nutrition, why not highlight back to school baking ingredients that add a nutritional pop to traditional treats? Feature whole grains such as oatmeal, whole wheat flour, rice flour and also gluten-free ingredients for cookies, muffins, and after school snacks. Of course, vanilla and other flavorings from Nielsen-Massey Vanillas are a great way to add interest and flavor without added calories, sodium or harmful additives. Nielsen-Massey Organic Pure Vanilla Extract is a perfect complement to whole grain and gluten-free ingredients. This vanilla is made from the highest quality or ganically grown vanilla beans and certified organic alcohol.

When the autumn holidays roll around, why not emphasize adding nutrient-rich ingredients such as pumpkin, squash or carrots to typical holiday goodies? Pumpkin cookies made with oatmeal are a yummy and healthy treat. The addition of Nielsen-Massey Organic Pure Vanilla Extract can add a flavor burst that is heavenly—and wholly unexpected. Dress them up for Halloween with dried fruits and nuts and show your customers new tricks for traditional treats!

Here’s to Your Health: Spring Cleaning

Green Cleaning

As the snow finally begins to melt in our not so warm climates, it’s that time of the year again most of us dread for only one reason—spring cleaning! It’s exhausting when you spend hours cleaning your home from top to bottom. Even frustrating, trying to get that sparkle clean look which sometimes goes unnoticed. Nielsen-Massey Vanillas has a spring cleaning tip that always gets recognition, scent. Smell is one of our strongest senses, and nothing says clean like the fresh scent of vanilla!

Here are some great homemade air fresheners to try. Fill a large sauce pan with water and add 2-3 teaspoons of our Madagascar Bourbon Pure Vanilla Extract or our Pure Lemon Extract. Simmer, and replace water as it evaporates. It’s economical and the scent will linger throughout the house, signaling the “clean” feeling you’ve been looking for Also to refresh the scent in your car, break one of our Whole Vanilla Beans in half and place it underneath the seat in your car for a lasting aromatic scent.

Check Out Sloane Miller’s New Book

Sloane Miller, Nielsen-Massey’s friend and food allergy expert, recently published a book called Allergic Girl Adventures in Living Well with Food Allergies. She has been living with food allergies since she can remember and chooses Nielsen-Massey’s allergy free products for her dishes. Check out her new book at: http://www.wiley.com/WileyCDA/WileyTitle/productCd-0470630000.dhtml

Nielsen-Massey Vanillas is proud to announce the expansion of their Waukegan facility. Whether it’s a new product or an exciting application, development at Nielsen-Massey never stops. Now, a construction project will expand and improve our American facility.

For the first time in nearly 20 years, Nielsen-Massey Vanillas is making plans to expand their Waukegan, Illinois plant. The current building is approximately 33,000 square feet, and the addition will bring the plant to 64,000 square feet. “The main purpose behind the expansion is more warehouse space. We will be able to increase our storage capacity by four to five times our current capacity”, says Craig Nielsen, CEO. New racking systems will be installed and there will be space to add new production lines.

In addition to increased warehouse and production space, plans include upgrades to the Quality Control laboratory, including new testing equipment, a larger work space, and more capacity for storage of records and paperwork. The expansion will also triple the number of offices and add more storage and meeting space in the office area. Also included in the expansion are plans for a new, larger break room for employees. A Culinary Center will be another welcome addition to the project (see page 3 for more details). Plans are also in place to increase the number of employees in 2011, states Craig, though the exact number of new hires is unknown at this time.

Groundbreaking is expected this April, with completion of the plant portion of the project scheduled for August. Production in the existing plant will not be affected by the construction, says Craig, as the new space will be built separately, and once the expansion is done “we will break through the walls to create passageways.” Office spaces are expected to be completed by December.

True to the visual aesthetic of the existing plant, new landscaping will create a beautiful setting for the new and improved Nielsen-Massey Vanillas Illinois location.

This spring and summer are sure to be exciting at Nielsen-Massey Vanillas. Ongoing information about the building project can be found in future Vanilla Vines and online at www.nielsenmassey.com.
**From the Chef’s Kitchen: Candace Nelson**

Sprinkles . . . six years ago this word had one meaning, a sugary topping used to decorate sweet treats. Now, when many people hear “Sprinkles” they think of the mega-successful, multi-chained Original Cupcake Bakery. We were lucky enough to interview the one and only Candace Nelson, founder of the gourmet bakery and long-time fan of Nielsen-Massey Vanillas.

How does one create such an empire, manage a family, appear as a judge on the Food Network’s Cupcake Wars, and remain kind and down to earth as Candace? It must be challenging, but throughout her interview we realized she does a great job at doing just that! For starters, Candace refers to Sprinkles as a Mom and Pop bakery, which at first was hard to believe knowing the success the bakery has had. However, that doubt was short lived after Candace’s response, “I am the Mom and Charles (her husband) is the Pops!” Her response evokes a smile, she goes on to explain that “Mom and Pop” is also an attitude that is reflected in the way they care for their product and customers. “There’s not much hierarchy at Sprinkles so everyone knows and feels that doubt was short lived after Candace’s response, “I am the Mom and Charles (her husband) is the Pops!” Her response evokes a smile, she goes on to explain that “Mom and Pop” is also an attitude that is reflected in the way they care for their product and customers. “There’s not much hierarchy at Sprinkles so everyone knows and feels that they are working with Charles and me. We are really just one big family!”

There is something about the name, Sprinkles. Candace says that it just popped into her head and she knew instantly it was the perfect name.

**“It’s playful, simple and memorable,” and we couldn’t agree more!**

The first Sprinkles bakery opened in Beverly Hills in 2005. There are now eight Sprinkles locations, and that number continues to steadily increase.

The dream of owning a bakery started at a young age for Candace. She grew up baking with her mother. “I have always loved and romanticized the idea,” she says. In 2002 Candace graduated from the professional pastry program at Tante Marie’s Cooking School in San Francisco, which is also where she first discovered Nielsen-Massey Vanillas.

It’s hard to believe that only three years ago after graduating Candace opened her first of many cupcake bakeries. She explains how the idea started, “Traditionally, the baking industry spotlighted full-size cakes, and cupcakes were an afterthought. They were often made with leftover cake batter and had a reputation for being dry and saturated with artificial ingredients. After graduating pastry school, I started a custom cake business out of my house. I found myself asking, ‘Why can’t we create something as delicious and memorable as a fancy restaurant dish?’ And so the concept of Sprinkles was born.”

An idea that many Sprinkles, and sweet indulgent fans are grateful for. What makes these little gourmet cakes so delectable? We know of two very important Sprinkles’ ingredients, our Nielsen-Massey Madagascar Bourbon Pure Vanilla Extract and our Pure Vanilla Bean Paste. Candace explains to us that she chose Nielsen-Massey’s products over other vanillas because of the quality, flavor and customer service. “Superior quality, flavor and customer service.”

With six years under her belt as the cupcake guru, we wondered, how does she continue to develop creative and decadent flavors? “Sometimes I will take flavors I like in other food or drink forms, like a Chai Latte or a Salty Caramel and turn it into a cupcake flavor.” Other times she will try to reinvigorate a forgotten flavor like German chocolate. Candace is even inspired by people, like her banana and papaya king cake in honor of Elvis—what a delicious inspiration!

Being a devout user of Nielsen-Massey Vanillas, Candace does have a baking tip to share with the Sprinkle fans readers, “Pre-mix vanilla with other wet ingredients so you don’t forget it!”

If Candace Nelson were to describe Nielsen-Massey Vanillas in one word it would be, “Quality.”

**Hot Trends Fresh Out of the Oven — Mini Pies!**

Every year reputable magazines, websites and companies create major buzz around the trends to look out for in the New Year—2011 was no exception. A food trend that has now been on the radar for sometime is “small portions.” This well established trend seems to be evolving from a temporary idea into a permanent way of life. According to Nation’s Restaurant News, Andrew Freeman, marketing consultant for restaurants and hotels nationwide stated, “Small plates were the big buzzword over the last couple of years . . . This year “mini” is the new buzzword. Mini every- thing: mini portions, mini desserts.” Mini plates are economical and a great way for customers to experience as many tasty items as possible. Which is why most of us choose to eat where/what we do—it’s all about the experience. So what does the consumer want to experience? The trend watchers all seem to agree, pies will be a hot food trend in 2011. Freeman explains if he could predict only one trend for 2011, it would be the trend for pie. Also stating, “I think that we’re going to see pie shops in the next year.” Pie is the ultimate comfort food, but this trend goes beyond the standard sweet pie we’ve always known. This new trend includes both sweet and savory, and of course mini pies! Even The Food Channel made small pies the number one trend on their list of “10 Op Foods to Watch in 2011.”

With small portions, particularly pies impacting this year’s food industry, Nielsen-Massey Vanillas understands the importance in creating a memorable burst of flavor in every bite! Upscale your small pies in a big way by adding any one of Nielsen-Massey Vanillas high quality products. Some tasty ideas include: Pure Chocolate Extract in French silk pie, Madagascar Bourbon Pure Vanilla Extract in apple pie, Pure Lemon Extract in lemon chicken pot pie, Tahitian Pure Vanilla Extract in cherry pie, Mexican Pure Vanilla Extract in pumpkin pie, or even enhance your pie dough with our Pure Almond Extract.

**The ICING on the cupCAKE . . . Candace Nelson fun facts.**

- Candace lived in Southeast Asia, including Indonesia as a child and on- and-off throughout her adult life.
- Aside from spending time with her husband and two sons, Candace enjoys looking at contemporary art.
- Sprinkles in Chicago opened July 26th of 2010 with the help of Brill and Giuliana Rancic.
- Most people would be surprised to find out that Candace used to work at an investment bank.
- The most memorable experience in Candace’s career is when she flew the redeye to Chicago with 300 cupcakes as carry-on luggage, as featured on the Oprah Winfrey show.

**Dark Chocolate Frosting**

**Ingredients**

- 3 cup (1 1/2 sticks) unsalted butter, firm, cut into small pieces
- 2 1/2 cups confections’ sugar, sifted
- 1 teaspoon Nielsen-Massey Madagascar Bourbon Pure Vanilla Extract
- 5 ounces bittersweet chocolate, melted and cooled to room temperature
- Milk for adjusting frosting consistency

**Directions**

In the bowl of an electric mixer fitted with a flat beater attachment, beat butter and salt on medium speed until fluffy, about 2 minutes. Add chocolate to bowl and beat until smooth and creamy. Beat in vanilla and continue to beat until mixture is smooth. Beat in 2 tablespoons of milk, beat until mixture is smooth. Add remaining milk and beat until mixture is smooth. If needed, add milk to thinning at a time if frosting does not have a spreadable consistency. Avoid over mixing frosting, it should be creamy and dense.

**Culinary Center a Welcome Addition to the New Space**

Canyes Rejoice!

The new Nielsen-Massey Vanillas Culinary Center will provide an ideal venue for the talents of local and visiting chefs, bakers and students. The Culinary Center will be available for use for research and development, demonstrations, guest chefs, and culinary classes. Research chefs will use the space to develop new recipes, products and applications. Guest chefs will be able to prepare dishes to showcase their expertise with vanilla and other Nielsen-Massey flavorings in the new demo kitchen. Students will be able to personally observe the application of all of Nielsen-Massey’s line of products, analyzing the characteristic aromas and tasting the distinctive flavors of Pure Vanilla as they go. The new kitchen facility will make it possible for students to learn hands-on techniques, and to practice some of the latest innovations in culinary arts. The Culinary Center will provide an ideal opportunity to have video equipment as well, providing an opportunity for chefs to record their use of Nielsen-Massey Vanillas’ products in different applications. Videos will be very useful for the training and education of culinary students, brokers and buyers, and others interested in learning professional techniques and tips in the use of Pure Vanilla and other flavors.

The new Culinary Center is due to open in December, as the crowning jewel in the new 31,000 square foot expansion the company is constructing this year.
